

COMBINED LISBON MEETING ON HIP REVISION ARTHROPLASTY

1st December, 2018 | Lisbon

ORGANIZATION

Secção da Anca

SECRETARIAT

www.academiacuf.pt

SCIENTIFIC SPONSORS

EUROPEAN HIP SOCIETY

SPOT - Sociedade Portuguesa
de Ortopedia e Traumatologia

Secção para o Estudo
da Patologia da Anca

General

Hip anatomy relevant in hip arthroplasty revision
Surgical approaches in revision arthroplasty
Evaluation of the painful total hip arthroplasty
Acetabular and femoral bone defect classification
Removal of well fixed implants and cement
Revision of metal on metal arthroplasty and for taper corrosion
Epidemics of revisions in young patients

Acetabular reconstruction

Acetabular reconstruction with augments. Technique and pitfalls
Acetabular reconstruction with reinforcement rings. Technique and pitfalls
Impaction grafting in acetabular reconstruction
Management of pelvic discontinuity
3D Custom made implants
Strategies for acetabular reconstruction in Paprosky type I and II defects
Strategies for acetabular reconstruction in Paprosky type III defects

Femoral reconstruction³

Cemented femoral revision and cement in cement
Cementless stems - Monoblock or modular?
Strategies for femoral bone loss in Paprosky type I to IIIA defects
Strategies for femoral bone loss in Paprosky type IIIB and IV defects

Complications

Instability and abductor deficiency
Periprosthetic acetabular fractures
Periprosthetic femoral fractures

Infection

Diagnosis of periprosthetic joint infection
Management of the early infection
Getting the right systemic and local antibiotics
One stage revision. When and why?
Two stage and partial two-stage revision
